

Hnin Oo Wai

Machine Learning Researcher

ABOUT ME

Machine Learning researcher with two published conference papers and hands-on experience building predictive models and pattern mining systems. Proficient in Python and end-to-end ML workflows, translating data into actionable insights for healthcare and behavioral analytics.

RESEARCH EXPERIENCE

Integrating Machine Learning into Consumer Behaviour Analysis for Insect-Based Protein Supplements (2026)

- Developed classification, clustering, and association rule mining models to analyze consumer behavior in Thailand's insect-based protein market.
- Random Forest achieved the highest predictive accuracy (76.11%), while segmentation and FP-Growth analysis revealed key consumer profiles and pricing influences.

Mining Students Behavior Patterns for Mental Health Insights using Association Rule Learning (2025)

[Published in IEEE \(2025\)](#)

- Applied FP-Growth on survey data (266 Thai students) to identify key mental health risk and protective patterns (financial support, sleep quality, digital habits).
- Produced interpretable, data-driven insights to inform evidence-based student mental health interventions.

Machine Learning-Driven Prediction and Analysis of Mental Health Risks Among University Students (2025)

[Published in IEEE \(2025\)](#)

- Built ML models to detect mental health risk in university students, XGBoost achieved the best performance (F1-score: 83.90%, accuracy: 90.60%).
- Conducted correlation and clustering analyses to identify key behavioral predictors and high-risk subgroups.

TECHNICAL SKILLS

- Python (pandas, NumPy, scikit-learn)
- SQL
- XGBoost, Random Forest, Classification, Clustering, Association Rule Mining, Feature Engineering
- Hypothesis Testing, Cross-Validation, F1-score
- Git/Github
- Data Preprocessing

LANGUAGES

- English (Professional)
- Burmese (Native)

EDUCATION

Mae Fah Luang University | Thailand

2023 - 2027 (Expected)

GPAX - 3.78

3rd Year, Digital Technology for Business Innovation Major,
School of Applied Digital Technology
